### DETAILED ACTION

Claims 1-16 are pending in the instant application.

#### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a method for lowering serum cholesterol or triglyceride by delivering a construct encoding a fusion protein comprising a LDLR and a localization domain operatively linked to a promoter, and said construct, classified in class 514, subclass 44, class 536, subclass 23.4.
- II. Claims 13-16, drawn to a fusion protein comprising a LDLR and a localization domain, classified in class 530, subclass 359.

The inventions are distinct, each from the other because of the following reasons:

Invention I and II are patentably distinct because the inventions are drawn to materially different compositions and methods that require different starting materials and modes of operation. The nucleic acid of Group I is chemically, biologically, and functionally different from the protein of Group II. Although the construct of Group I can be used to make the protein of Group II, it is not limited to this use. The construct can also be used in making a transgenic animal. In addition, the protein of Group II can also be used to produce antibody. Thus, the compositions and methods of inventions of Group I and II are patentably distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
